CAREER OBJECTIVE

I am a Full Stack Web Developer with experience in HTML, CSS, JavaScript, React, NodeJS, NextJS and MongoDB. I have built projects like AgriConnect, TripGenie, Feelify, Startup Idea Validator, and StyleSense. Now I am exploring AI and ML to create intelligent and user-centric applications.

EDUCATION

Bachelor of Engineering (B.E), Information Technology

2023 - 2027

Chaitanya Bharathi Institute Of Technology Autonomous

CGPA: 9.56/10

Senior Secondary (XII), Telangana State Board Of Intermediate Education

2023

SRI CHAITANYA JUNIOR COLLEGE

Percentage: 98.80%

TRAININGS / CERTIFICATIONS

Salesforce Advanced Administrator, Agentforce

Jul 2025 - Aug 2025

Salesforce, Virtual

Successfully completed the certification requirements for Salesforce Advanced Administrator. The certification validates expertise in advanced Salesforce administration concepts including user management, automation, data management, and security.

Credential ID: 6637661.

MongoDB Certification

Mar 2025

MongoDB, Virtual

Successfully completed certification on MongoDB, validating knowledge of core database concepts including CRUD operations, schema design, aggregation framework, indexing, and performance optimization.

Credential ID: MDBota9vtqyhy.

Web Development

Aug 2024 - Sep 2024

Internshala Trainings, Virtual

Successfully completed a 8 weeks online certified training on Web Development. The training consisted of HTML, CSS, Bootstrap, DBMS, PHP, JS, React, Final Project, and AI in Web Development modules. I scored 100% in the final assessment and was a top performer in the training.

PORTFOLIO

PROJECTS

Google Cloud Skill Badges

Jul 2025

Google Cloud, Virtual

Successfully earned two introductory skill badges on Google Cloud. The first, Build Real World AI Applications with Gemini and Imagen, focused on applying generative AI models to real-world use cases. The second, Prompt Design in Vertex AI, covered effective prompt engineering techniques for building AI-powered applications. These badges strengthened my foundation in AI, prompt design, and cloud-based machine learning workflows.

Complete Python Pro Bootcamp

Jan 2025 - Mar 2025

udemy, Virtual

The Complete Python Pro Bootcamp:100 Days of Code(Udemy) is a project-based course designed to help learners master python .It covers fundamentals ,OOP ,file handling ,web scraping (Pandas,NumPy).

[Validly.AI- Startup Idea Validator ↗](#)

Jun 2025 - Jul 2025

Tech Stack: Next.js, Node.js, MongoDB, Web Scraping, NLP, AI APIs

Startup Idea Validator is a platform that helps entrepreneurs validate their ideas. It provides AI-generated SWOT analysis, competitor research, and market trend detection. Users can store their idea history, revisit results, and receive AI-powered insights. Future plans include pitch deck generation and investor-matching features.

[AgriConnect ↗](#)

Feb 2025 - Apr 2025

Tech Stack: HTML, CSS, JavaScript, Node.js, Express.js, MongoDB, Sentiment Analysis

AgriConnect connects farmers and laborers for seamless job matching. Farmers post jobs, and laborers filter and apply based on location, wages, and skills. Features include secure authentication, live job tracking, sentiment-based reviews, and direct call/navigation options. The dashboard provides real-time job updates, ensuring smooth interaction. Future plans include mobile optimization and offline access.

[StyleSense ↗](#)

Aug 2025 - Present

Tech Stack: Next.js, Tailwind CSS, FastAPI, PyTorch, DeepFashion Dataset, Fashion APIs

StyleSense is an AI-powered fashion recommendation app where users upload a photo to receive outfit suggestions based on detected clothing styles. It uses a CNN model fine-tuned on the DeepFashion dataset and integrates with APIs like ASOS and Zalando for real product recommendations. Features include a style history, capsule wardrobe suggestions, and outfit part detection.

SKILLS

- | | | |
|-------------------------------------|------------|--------------|
| • HTML | • CSS | • Python |
| • Java | • MongoDB | • Express.js |
| • Node.js | • Selenium | • JavaScript |
| • Next.js | • GitHub | • React |
| • Natural Language Processing (NLP) | | |

[Feelify ↗](#)

May 2025

Tech Stack: Next.js, Node.js, Flask/FastAPI, NLP, Sklearn, YouTube API

Feelify is a mood-based music recommendation app that detects user emotions from text input and suggests songs accordingly. It uses NLP sentiment classification to identify moods and integrates with the YouTube API for real-time recommendations. Additional features include voice input, mood-based theming, and an analytics dashboard for user insights.

[TripGenie ↗](#)

Apr 2025

Tech Stack: NextJS, JavaScript, React, Node.js, Express.js, AI APIs

TripGenie is an AI-powered trip planning platform that generates personalized itineraries. Users enter a destination and trip duration, and the system provides day-wise plans including hotels, restaurants, and sightseeing spots. Features include AI-powered regeneration, save-to-profile options, and interactive visuals. Future enhancements include social trip sharing and mobile support.
